

## Baby Hemp Greens

Our Baby Hemp Greens is the only non-GMO, certified organic hemp greens approved by the FDA as fresh produce. They are high in Alphas and Omegas and are scientifically tested and shown to contain higher nutritional value and fiber than spinach, kale, and other leafy greens. The fiber is in the stem. Incorporate this superfood into your diet. Blend Baby Hemp Greens into your smoothie in the morning, add them to your salad or sandwiches at lunch, and stir fry it with your favorite protein at dinner.
